# Smart Home & IoT Devices

## How they work?

### Integration of Smart Devices

Retrofit solutions add smart modules, plugs, switches, or sensors to existing systems without replacement. They connect seamlessly to Wi-Fi or a smart hub..

### Centralized Control

Use smartphone apps or voice assistants to manage lighting, security, and appliances, offering convenience and energy efficiency.

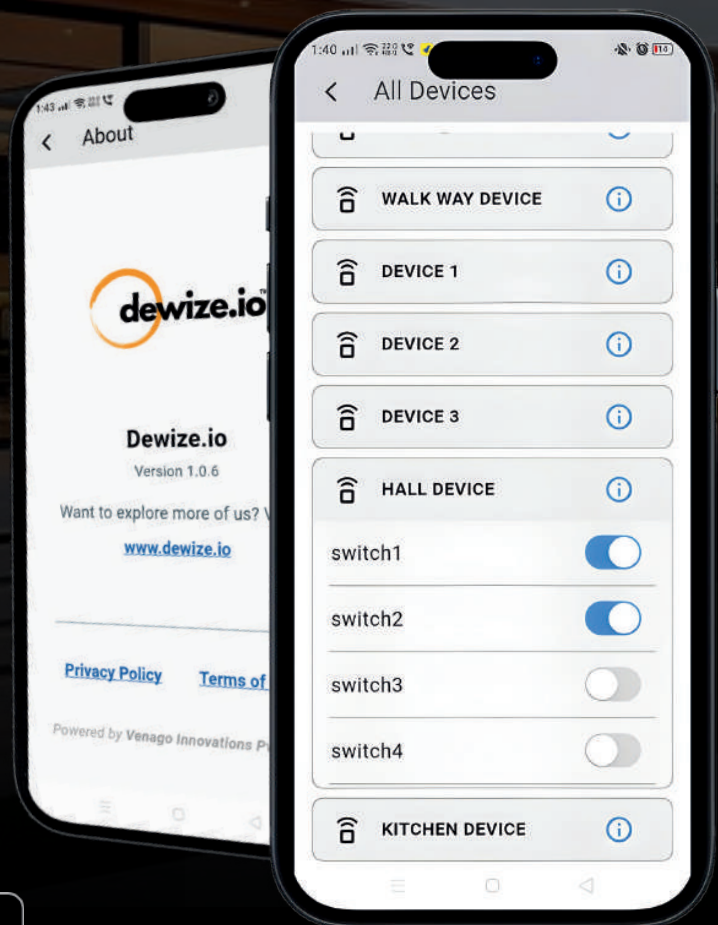

### Easy Installation

Quick and cost-effective setup without rewiring or major changes, making it ideal for upgrading traditional homes.
